EDUCATION

- **Duquesne University** Pittsburgh, PA
Bachelor of Science in Computer Science, Minor in Mathematics Aug 2023 – May 2027
- **Duquesne University** Pittsburgh, PA
Master of Science in Computer Science Aug 2026 – May 2028

EXPERIENCE

- **United States Steel Corporation** Pittsburgh, PA
Software Engineer Intern Jan 2025 – Present
 - **AI Infrastructure:** Built internal **LLM** infrastructure and **MCP servers** using FastMCP, vLLM, Qwen, Docker, Podman, Nginx, and FastAPI to support secure enterprise AI workflows; authored standards governing AI system usage and development across the org.
 - **Computer Vision:** Developed a full-stack PPE safety compliance application and trained a computer vision model to detect company-specific personal protective equipment for automated safety monitoring across plant facilities.
 - **ML Infrastructure:** Designed and implemented a camera health monitoring platform to validate plant camera feed quality against requirements for downstream ML/AI inference.
 - **Data Engineering:** Engineered data archiving and integration solutions across **PostgreSQL, Microsoft SQL Server, and OSIsoft PI / PI AF**, enabling long-term retention and analysis of manufacturing data while modernizing legacy internal applications.
 - **Analytics:** Built a statistical modeling solution in R to estimate production-line operational efficiency, supporting data-driven operational decision-making.
 - **Software Development:** Designed and implemented software solutions aligned with business needs and development standards, maintaining application and network security within the U.S. Steel environment while collaborating cross-functionally in an agile, modified-Scrum setting.
- **Commonwealth of Pennsylvania** Uniontown, PA
Information Technology Intern May 2024 – August 2024
 - **Systems Support:** Installed operating systems, software images, and applications on personal computers and managed networking infrastructure, including structured cabling operations.
 - **Device Management:** Configured and supported mobile devices (iPhones, iPads, cell phones, air cards) across the organization via Intune.

PROJECTS

- **PghPizza.org:** Developed a Full-Stack web application for my friends and I to track pizza places in the Pittsburgh area we visit. Currently has ten contributors and twenty active members. Created using AngularJS and Java Spring Boot that interacts with a Postgres database. Deployed as a containerized application that uses a reverse proxy(nginx) to route API calls between containers.
- **Duqschut:** Worked on a team of 25 students on the development of a web-based tutor scheduling system for Duquesne University's Computer Science and Mathematics department. The application was built using .NET Blazor framework. Oversaw backend logic and database design, and directly managed a sub-team of 5 developers.

PROGRAMMING SKILLS

- **Languages:** Java, Python, C#, C++, JavaScript, TypeScript, SQL, Bash
- **Frameworks:** .NET, Blazor, Pytorch, NextJS, Angular, Spring Boot, FastAPI, FastMCP
- **Tools:** Git, Docker/Podman, CI/CD, MQTT, Kubernetes, Linux, Windows, Virtual Machines
- **Databases:** SQLite, Microsoft Sql Server, Postgres, Oracle
